Bengaluru, India +91 8277920343 anagha.sakaray@gmail.com LinkedIn GitHub

Summary

Recent Computer Science (AI & ML) graduate with hands-on experience in computer vision and AI, including dataset creation, model training and fine-tuning, and evaluation. Currently an AI Engineer at Techcrafter.cps, building computer vision solutions for factories. Keen to keep exploring CNN and Transformer architectures, and looking to grow a career in computer vision and AI.

Experience

Techcrafter.cps **Apr 2026 – Present**
AI Engineer (Intern, then Full-time) *Bengaluru*

- Building AI-based computer vision solutions for factories, focused on industrial safety monitoring from camera feeds.
- Own the model workflow in Python, from dataset creation and annotation through fine-tuning and evaluation.

Hindustan Aeronautics Limited (HAL) **Apr 2025 – May 2025**
Project Intern *Bengaluru*

- Deployed an offline English–Hindi/Kannada translation app (Flask, Transformer models) for internal use.

Projects

AEGIS: AI-Enabled Guardian for Industrial Safety | *Python, OpenCV, PyTorch* **Apr 2026 – Present**

- AI system that monitors factory camera feeds to detect safety hazards and unsafe worker behavior.
- Built a CNN-based PPE and worker detector: collected the dataset from elevated top-angle CCTV views, annotated (Roboflow) and augmented it, fine-tuned the model and reached ∼87% accuracy.
- Built unsafe posture and fall detection using a pose-estimation CNN, keypoints and rule-based analysis.

NotifyNPick: Real-Time Inventory Management | *Python, OpenCV, Tesseract, Tkinter* | Demo Link

- Led launch of an automated inventory system for Village Mail & More (San Diego), cutting manual labor.
- Automated ticketing and tracking with OCR and barcode recognition (OpenCV, PyZbar, Tesseract).
- Integrated Dropbox and email APIs for real-time inventory updates and notifications.

HireMate AI: Career & Interview Prep | *Python, Flask, LLM APIs, Web Speech API* **Ongoing**

- Developing an AI placement-prep platform with ATS-compliant resume generation and job–resume fit scoring.
- Implemented AI mock interviews and adaptive aptitude tests with speech-based evaluation of clarity and confidence.
- Designed an AI-simulated group discussion module with real-time feedback and communication analytics.

Technical Skills

Languages: Python, SQL
Computer Vision & ML: OpenCV, PyTorch, Ultralytics, Roboflow, Tesseract OCR, NumPy, Pandas, Scikit-learn
Areas: Computer Vision, Object Detection, Pose Estimation, Model Fine-tuning & Evaluation, Data Augmentation
Tools: Flask, LLM APIs, Tkinter, Git, GitHub, Power BI

Education

JSS Academy of Technical Education, Bengaluru **2022 – 2026**
Bachelor of Engineering in Computer Science (Artificial Intelligence and Machine Learning) *CGPA: 8.9/10*

Indian Institute of Technology, Mandi **2025 – 2026**
Minor in Artificial Intelligence

Leadership / Extracurricular

Arthouse (Design Club) – *Designer* JSSATEB

Meraki (Drama Club) – *Technical Director & Scriptwriter* JSSATEB

NSS – *Social Service Volunteer* JSSATEB
